	Super Bulky Super Chunky Roving	14 - 16 ply

Blanket Sizes (in/cm)

- **Receiving Blanket**
(40in wide x 40in long)
(101.6cm x 101.6cm)
- **Crib Blanket**
(36in wide x 54in long)
(91.44cm x 137.16cm)
- **Lapghan**
(40in wide x 48in long)
(101.6cm x 121.92cm)
- **Small Throw**
(52in wide x 60in long)
(132.08cm x 152.4cm)
- **Large Throw**
(60in wide x 72in long)
(152.4cm x 182.88cm)
- **Twin**
(59in wide x 85in long)
(149.86cm x 215.9cm)
- **Full**
(74in wide x 85in long)
(187.96cm x 215.9cm)
- **Queen**
(80in wide x 90in long)
(203.2cm x 228.6cm)
- **King**
(96in wide x 90in long)
(243.84cm x 228.6cm)

What you will need:

- A Measuring Tape
- Crochet Hook/ Knitting Needles
- Your Choice of yarn (Make sure it is a full skein/ball)

Guide: How Much Yarn Will You Need For That Blanket?

Step 1: Chain Foundation Row to measure 3 inches past recommended width dimension. Depending on the pattern it may be best if you work the first two rows so you know the exact width the blanket will turn out to be.

*****Make sure to account for the patterns stitch count requirements*****

Step 2: Work as many rows as you can using up the entire skein of yarn.

Step 3: Measure how many full rows you were able to make with one skein/ball of yarn.

Step 4: Divide Total length for blanket dimensions by the length made by one skein/ball of yarn.

This will tell you how many skeins of that exact yarn you will need for that exact blanket pattern and blanket size.

Desired Blanket Size: _____

Pattern: _____

Yarn Size: _____

Crochet Hook Size: _____

Length One Skein made: _____

$$\frac{\text{Desired Blanket Length}}{\text{Length Of One Skein}} = \text{_____} \text{ Number of Skeins it will take to make the blanket}$$
